

Circular

To employers in the government sector (federal and local) and the private sector subject to the federal pension and social security laws and their amendments

Regarding exempting employers from incurring additional payments for the months of October and November 2024

In conjunction with launching the *Ma'ashi* digital platform on 28th October 2024, and as appreciation to the support received by GPSSA's strategic partners in launching an important transformational project, a decision has been taken by the Board of Directors to exempt employers in the government (federal and local) and private sectors, without the need to incur additional fees as a result of contribution delays in October and November 2024 and within the legally stated dates as per pension laws. As a result, employers are requested to complete their contribution transfers on the *Ma'ashi* platform without having to incur financial consequences.

The GPSSA requires organizations and entrepreneurs to take advantage of the exemption period before the expiration date and to validate and comply with the insurance process.
